6. Conclusion

WBAN provides a wide range of application to improve the quality of life. It is continuously evolving and is under active research. Several investigations had already been carried out in this field and lots of challenges are still need attention from the research community especially in channel modeling of WBAN. This work provides a comprehensive survey of current state-of-the-art in WBAN channel modeling and its behavioral dependence on channel dynamics. Major issues related to channel modeling has been extracted and a possible future direction of research in the development of WBAN highlighted. It is expected that this work will act as ready reference for researchers and academicians working for further development of WBAN based system.
