عنوان فارسی مقاله:
نقش گردشگری مجازی در خلق ثروت کشورها

عنوان انگلیسی مقاله:
The role of virtual tourism in creating national wealth
4. Summary and Conclusion

By analyzing virtual tourism and its role in people’s lives, pros and cons of this system is obvious. As said before, this kind of tourism, by saving time, place, costs and easier access, is more economical than real tourism and allows the user to tour in any time and place with the least expense. The task of officials is very important in this matter and all entities must have necessary collaborations. But, despite all of this, the term virtual is rapidly growing these days and has diminished personal relationships, unrealistic views, lack of sense of being in place and such which makes culture-building before its popularity very important.

Virtual tourism, if used properly, will strengthen the relationship with all regions that are not accessible in person and has the ability of making money for professionals of the field and also developed countries in this field.
